"Practice Limited to Pediatrics"

**ACCIDENTS ARE THE #1 CAUSE OF DEATH IN CHILDREN
UNDER FIVE**

Preschool and School Age Safety

It's time to help your child learn his phone number and address. Just help them practice, practice and practice.

Continue to insist upon the use of bicycle helmets.

Sunscreen (non-PABA) with SPF of 30 should be used whenever your child is outside. Hats still provide protection.

Don't allow your child to be around water without adult supervision.

Keep your child in his car seat until he outgrows it based on the manufacturer's guidelines and state law. Children under 8 years old and between 40 and 57 inches in height, must be secured using a booster seat. Children 40 inches or less, must be properly secured in a child restraint system.
